1. /DFG/U.S.-German Collaboration in Natural and Engineering Sciences between NSF and DFG: Pre-announcement, Deadline: 01.05.2015

/DFG/ The National Science Foundation (NSF) and the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation) are pleased to announce their cooperation in funding international research and training programmes. To support German-U.S. research and training projects, NSF and DFG have agreed to align application and funding processes within NSF's Partnerships for International Research and Education (PIRE) programme and DFG's Research Training Groups (RTG) programme. Both programmes utilise systematic international cooperation for tackling scientific challenges and as a framework for training the next generation of researchers.

In the 2014 solicitation, published by NSF on 21 July 2014, new PIRE initiatives may cooperate with an existing Research Training Group or International Research Training Group (RTG/IRTG) already funded by DFG. A list of all funded Research Training Groups can be found at the DFG's homepage (link see below "Further information").

The German partners can apply for complementary funding from the Deutsche Forschungsgemeinschaft through a supplemental proposal process ("Zusatzantrag"). Funding through this scheme can be provided for research exchange, joint training activities and coordinative measures.

Prerequisite for submission of a supplemental proposal to DFG will be a positive evaluation of the PIRE pre-proposal and a full proposal invitation by NSF. RTG/IRTG supplemental proposals and PIRE full proposals will be evaluated in parallel by both organisations, and DFG funding will be contingent on a positive decision by NSF. Funding for the German partners will be awarded in accordance with the policies of the DFG. The funding duration is limited to the duration of the current RTG/IRTG funding period.

2. /DFG/ EarthShape: Earth Surface Shaping by Biota (SPP 1803), Deadline: 25.02.2015

/DFG/ The Senate of the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation) has established a new Priority Programme entitled "EarthShape: Earth Surface Shaping by Biota" (SPP 1803). The programme is designed to run for six years; the present call invites proposals for the first three-year funding period.

A common geoscience paradigm holds that the Earth's surface is shaped mainly by climate (eroding soil) and tectonics (building mountains). The EarthShape project challenges this paradigm to explore in one of the most spectacular climate and vegetation gradients (the Chilean coastal range) how in addition biologic processes form soil, influence topography, and thereby shape the Earth's surface and modulate the impact of climate change on the Earth's surface. New scientific technology now allows identification of the role of microorganisms, plants, and animals on the formation of soils and the shape of topography. EarthShape invites scientists of different scientific disciplines in the geosciences, ecology, soil sciences, hydrology, microbiology, and geography to work on this common problem of human relevance. The new and innovative aspect of this Priority Programme is the integration of different bio- and geoscience communities that work on different time scales. Emphasis is placed on non-anthropogenic geomorphic processes.

Individual research projects should contribute to at least one of the following five scientific goals, to which an application should explicitly refer:

Cluster 1: Micro-biota as the "weathering engine". Investigations in this cluster involve quantifying different mechanisms of biogenic weathering. Proposals in this cluster should quantify the biological organism network whereby plants, fungi, and bacteria interact in the production of soils.

Cluster 2: Bio-mediated redistribution of material within the weathering zone. Investigations in this cluster should study soil catenas along hillslope profiles to investigate the movement of dissolved, mineral, and organic materials along the transport trajectory in different Chilean vegetation zones.

Cluster 3: Biotic modulation of erosion and sediment routing at the catchment-scale. Proposals in this cluster should explore the effects of vegetation cover and type on solute and sediment transport from hillslopes to the channel network, and the change of these effects along the vegetation gradient.

Cluster 4: Depositional legacy of coupled biogenic and Earth surface systems. Studies in this cluster will focus on depositional environments (lakes, offshore sediment) where a well-defined upstream catchment or sediment source is available. The short-term (annual to decadal) and long-term (millennial to glacial/interglacial) relationship between depositional processes and vegetation composition should be explored using proxy data from sedimentary archives.

Bridging time scales with coupled system modeling. EarthShape intends to integrate the previous four research clusters and bridge between time scales through numerical modeling. This could include modeling expertise in: landscape evolution, soil erosion, surface and near surface hydrology, dynamic vegetation, eco-hydrological, and geochemistry. These models should be calibrated with present-day data and then extrapolated to longer time scale data sets.

Study Area: EarthShape research will be conducted in selected natural reserves in the Chilean coastal range that features spectacular vegetation gradients and is controlled by climate ranging from hyper-arid to humid temperate.

Paired / Linked Investigations: Submitted proposals are encouraged (but not required) to include at least two PI's from different disciplines (e.g., biologist or biogeoscientist and geoscientist; soil scientist and geoscientist; biologist and hydrologist). Proposals can be submitted as paired (one proposal with multiple investigators), or submitted separately with very clear cross-links to each other. In the latter approach proposals can be independently funded if one of the proposals is not of sufficient quality.

3. /BMW*/ 2. Ausschreibung zwischen Deutschland und Alberta (Kanada) für gemeinsame Forschungs- und Entwicklungsprojekte kleiner und mittlerer Unternehmen, Termin: 19.09.2014

/BMW/ZIM/ Deutschland und Alberta veröffentlichen hiermit eine Ausschreibung für gemeinsame Forschungs- und Entwicklungsprojekte (FuE-Projekte) zwischen kleinen und mittleren Unternehmen (KMU) zur Entwicklung innovativer Produkte, Verfahren oder technischer Dienstleistungen aus allen Technologie- und Anwendungsbereichen mit großem Marktpotential. Das Ministerium für Unternehmen und höhere Bildung von Alberta (EAE) und das Bundesministerium für Wirtschaft und Energie (BMWi) ermöglichen den Zugang zu öffentlichen Fördermitteln für gemeinsame Projekte. In Deutschland erfolgt die Förderung im Rahmen des Zentralen Innovationsprogramms Mittelstand (ZIM), in Alberta durch das Deutsch-Kanadische Zentrum für Innovation und Forschung (GCCIR) in Albertas internationalem Technologiepartnerschaftsprogramm (ITP). GCCIR und die AiF Projekt GmbH (Projektträger des BMWi) unterstützen die Projektpartnern in der Phase der Einreichung von Projektvorschlägen, in der Evaluierungs- und in der Monitoringphase.

Die zu erwartenden Projektergebnisse müssen zu marktwirksamen Innovationen (neue Produkte, Verfahren und/oder technische Dienstleistungen) führen. Die Projektanträge müssen folgenden Leitlinien entsprechen:

- Zu den Partnern müssen mindestens ein mittelständisches Unternehmen aus Alberta und eines aus Deutschland gehören, die jeweils wesentliche Beiträge zu dem Projekt leisten. Die Beteiligung von weiteren Unternehmen und Forschungseinrichtungen als weitere Teilnehmer oder Unterauftragnehmer ist, entsprechend der jeweiligen Förderregeln, willkommen.
- Es können auch Unternehmen und/oder Forschungseinrichtungen aus anderen Ländern teilnehmen. Die Teilnahme dieser Partner wird nicht durch das BMWi oder EAE gefördert.
- Das Projekt soll einen ersichtlichen Mehrwert aufgrund der Kooperation der Teilnehmer beider Gebiete erzielen (beispielsweise eine verbesserte Wissensgrundlage, Zugang zu FuE-Infrastrukturen, neue Anwendungsbereiche).
- Die Laufzeit der Projekte soll zwei Jahre nicht überschreiten.

Die Förderung wird gemäß den geltenden nationalen Gesetzen, Bestimmungen, Vorschriften und Verfahren gewährt.

4. /EU Horizon2020/ Seminar Horizont 2020 für Antragstellende, Termin: 18.09.-19.09.2014

/EUB Telegramm/ Am 18./19. September 2014 wird in Bonn die Seminarreihe "Das Rahmenprogramm für Antragstellende" des EU-Büros des BMBF fortgeführt. Die Veranstaltung richtet sich insbesondere an Wissenschaftlerinnen und Wissenschaftler, die eine Antragsbeteiligung planen. Erste Grundkenntnisse zu Horizont 2020 werden vorausgesetzt.

Für das Seminar wird eine Teilnahmegebühr erhoben. Die Anmeldung wird ab dem 29. Juli 2014 möglich sein.

-Advancing active and healthy ageing:

PHC 21 - 2015: Advancing active and healthy ageing with ICT: Early risk detection and intervention

-Integrated, sustainable, citizen-centred care:

PHC-25-2015: Advanced ICT systems and services for integrated care

PHC-27-2015: Self-management of health and disease and patient empowerment supported by ICT

PHC-28-2015: Self-management of health and disease and decision support systems based on predictive computer modelling used by the patient him or herself

PHC-29-2015: Public procurement of innovative eHealth services

-Improving health information, data exploitation and providing an evidence base for health policies and regulation

PHC-30-2015: Digital representation of health data to improve disease diagnosis and treatment

-Understanding health, ageing and disease:

PHC-02-2015: Understanding disease: systems medicine

PHC-03-2015: Understanding common mechanisms of diseases and their relevance in co-morbidities

-Effective health promotion, disease prevention, preparedness and screening:

PHC-04-2015: Health promotion and disease prevention: improved inter-sector co-operation for environment and health based interventions

-Improving diagnosis:

PHC 11 - 2015: Development of new diagnostic tools and technologies: in vivo medical imaging technologies

-Innovative treatments and technologies:

PHC 14 - 2015: New therapies for rare diseases

PHC 16 - 2015: Tools and technologies for advanced therapies

PHC 18 - 2015: Establishing effectiveness of health care interventions in the paediatric population

-Advancing active and healthy ageing:

PHC 22 - 2015: Promoting mental wellbeing in the ageing population

-Integrated, sustainable, citizen-centred care:

PHC 24 - 2015: Piloting personalised medicine in health and care systems

/EU Horizon2020/ Änderungen der Topics und veränderte Abgabefristen für das Arbeitsprogramm 2015:

Sustainable Food Security

-Sustainable food production systems:

SFS-01c-2015: Assessing sustainability of terrestrial livestock production

SFS-02b-2015: Assessing soil-improving cropping systems

SFS-05-2015: Strategies for crop productivity, stability and quality

SFS-07b-2015: Management and sustainable use of genetic resources

SFS-10b-2015: Scientific basis and tools for preventing and mitigating farmed mollusc diseases

SFS-11b-2015: Consolidating the environmental sustainability of European aquaculture

-Safe food and healthy diets and sustainable consumption:

SFS-13-2015: Biological contamination of crops and the food chain

SFS-16-2015: Tackling malnutrition in the elderly

-Global drivers of food security:

SFS-18-2015: Small farms but global markets: the role of small and family farms in food and nutrition security

SFS-20-2015: Sustainable food chains through public policies: the cases of the EU quality policy and of public sector food procurement

COMPETITIVE LOW-CARBON ENERGY

-Renewable electricity and heating/cooling:

LCE-04-2015: Market uptake of existing and emerging renewable electricity, heating and cooling technologies

-Modernising the European electricity grid:

LCE-05-2015: Innovation and technologies for the deployment of meshed off-shore grids

LCE-06-2015: Transmission grid and wholesale market

-Providing the energy system with flexibility through enhanced energy storage technologies:

LCE-09-2015: Large scale energy storage

-Sustainable biofuels and alternative fuels for the European transport fuel mix:

LCE-14-2015: Market uptake of existing and emerging sustainable bioenergy

-Supporting the development of a European research area in the field of energy:

LCE-18-2015: Supporting Joint Actions on demonstration and validation of innovative energy solutions

LCE-23-2015: Supporting the community in deploying a common framework for measuring the energy and environmental efficiency of the ICT-sector (Neu)

21. /Sonstiges/ Abel Prize 2015, Termin: 15.09.2014

/Abelprize/ The Norwegian Academy of Science and Letters hereby calls for nominations for the Abel Prize 2015, and invite you (or your society or institution) to nominate candidate(s). Your nomination should be accompanied by a description of the work and impact of the nominee/nominees, together with names of distinguished specialists in the field of the nominee/nominees who can be contacted for an independent opinion.

The right to nominate is open to anyone. Nominations are confidential and a nomination should not be made known to the nominee. Self-nominations are not acceptable. The prize can be awarded to a single

person or shared for closely related fundamental contributions. Deceased persons cannot be nominated. If an Abel Laureate passes away before receiving the prize, then the prize will be awarded post mortem. The Abel Committee recommends the candidate for the Abel Prize, and submits its recommendation to the Norwegian Academy of Science and Letters which selects the Abel Laureate on the basis of the recommendation from the committee.
