Smoke Alarms, Fatal Fires and Bodily Harm

The use of smoke alarms has increased across countries, often as a result of legal initiatives that made their use compulsory. Evidence on the effectiveness of such legislative measures in reducing fire-related fatalities and bodily harm, however, is still lacking. This empirical project seeks to provide first such evidence.

Biases and Inefficiency in the Academic Publishing Process

The phrase "publish or perish" succinctly describes the great importance of publications in academia for careers, promotions, and third-party funding. This empirical project investigates various potential biases related to author/editor institutional affiliation, gender, and location that may impede the efficiency of the publishing process.
